This is a percentage table that makes filling out your team's control sheets a bit easier. The control sheets must be turned in to the current Softcourt President within seven days after the last scheduled match.

Remember, a player's percentage is figured on the ACTUAL number of sets played. This includes those sets played in a different position than usually played and those sets played with a substitute partner. Forfeits do not count for or against a player as they were not sets played. (You may figure with an odd number of sets.)
